

New Paragliding Take-Off Site at Crn Vrv in Krushevo through the KET-J Project

As part of the “Krushevo and Elbasan, Journey in Nature and Adventure” project (KET-J), a new paragliding take-off site is being developed at the Crn Vrv location in the Municipality of Krushevo.

The new investment aims to improve conditions for safe and high-quality paragliding and strengthen Krushevo’s potential as one of Europe’s leading destinations for the sport.

The new take-off site will provide:

- Improved safety conditions for pilots.
- Better conditions for hosting international competitions and sporting events.
- An improved experience for paragliders and visitors.
- Support for sustainable tourism development and the local economy.

With its natural characteristics, favourable flying conditions and long-standing paragliding tradition, Krushevo is already recognised as an attractive destination for adventure tourism enthusiasts. The new take-off site at Crn Vrv will further contribute to expanding the tourism offer and increasing the international visibility of the region.

The “Krushevo and Elbasan, Journey in Nature and Adventure” project (KET-J) is implemented with financial support from the European Union through the IPA III Cross-Border Cooperation Programme North Macedonia and Albania. The project is implemented by the Municipality of Krushevo, Municipality of Elbasan, Center for Sustainable Development ALKA and Tjeter Vizion Organisation.

The signing of the Partnership Agreement marks the start of a joint initiative that will contribute to sustainable economic development, an improved tourism offer and stronger links between local communities in North Macedonia and Albania.
